Work Experience - Frontend Developer

Ashthvardhan Innovation, Bhilwara   (Sep 2021 - Apr 2022)

Working with the backend team and Integrate API's to show on frontend.

Building reusable components for future use.

Developing new user interfaces.

Projects

Youtube clone | Github] [Deployed]

The goal is to learn more about API through making this project and making different components.

 Learned about props, components, custom hooks, and react routers.

Score Board | [Github] [Deployed]

I have made this Fully Responsive Cricket Match Score Keeper in React JS , keeping in mind the rules of the game…

Tried to write clean code and implemented DRY rule, I uses most important React JS features -Custom Hooks

Contact List App | [Github] [Deployed]

This is a CRUD application where users can be able to add, update and delete the contact…

Here, I uses most important React JS features - React Hooks

Hobbies

Apart from writing codes.
